## **PRACTICAL 02**

❖ **AIM :** To demonstrate configuration of Mail server (SMTP).

❖ **Scenario :**

An organization named Green Tech

Mr. Tim is planning to set up the network for his company's branch office which contains 2 departments- Department A and Department B. The configuration should be done such that all the devices in those departments should be able to reach each other.

For security reasons, Mr. Tim doesn't want to use any external company service for mail. So, he asked his Network Engineer to set up the server in the company premises only to use the mail services. Therefore, help the network Engineer to do the same. Note the important point while designing and implementing the network. The branch office is connected to the main office. Therefore you need to show the network of the main office as well. The mail domain of the branch office is @future.second.in and the mail domain of the main office is @future.first.in. All the users in the main office and branch office should be able to send and receive the mail. Design the network so that at least 2 users are there in each department of the branch office and at least 3 users in each department of the main office. Static routing should be used in the entire network.

## ✓ Packet Tracer File :

## ✓ Sending Email to pc0 to pc3 :-

The screenshot shows the Cisco Packet Tracer interface. On the left, the network diagram is visible, showing the same setup as the previous image. On the right, the 'PC0' configuration window is open, specifically the 'Message' tab. The email configuration is as follows:  
 - \*\*From:\*\* user1@future.second.in  
 - \*\*To:\*\* user1@future.first.in  
 - \*\*Subject:\*\* TEST  
 - \*\*Message Body:\*\* TEST  
 - \*\*Sent:\*\* Fri Jul 21 2023 23:57:02  
 - \*\*Reply:\*\* (button)  
 At the bottom of the interface, the 'Simulation' window is open, showing a table with columns: Scenario, Fire, Last Status, Source, Destination, Type, Color, Time(sec), Periodic, Num, Edit, and Delete. The table is currently empty, and the 'Scenario' dropdown is set to 'Scenario 0'. Below the table, there are buttons for 'New', 'Delete', and 'Toggle PDU List Window'.
